Patent Examiner

The following is an examiner's statement of reasons for allowance: Fushiki (figs. 2-3), Kamiya (fig. 2) and Yokoyama (fig. 5) each disclose switching power amplifiers having dual power supplies of different levels selected according to the level of the output signal; however, none meet the limitations of the last paragraph of independent claims 1 & 5 requiring a regulating circuit connected between a positive side of a low voltage supply and a negative potential and a second regulating circuit connected between a negative side of the low voltage supply and a positive potential in the context claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
